# SABER X-15 PLUS Specifications & Technical Data

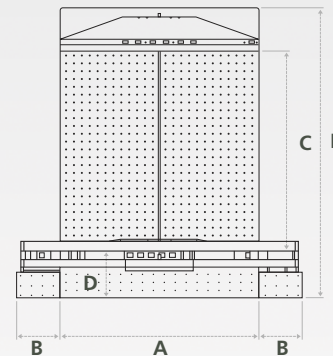

## FEATURES

- Variable clamping force from 500 - 20,000 lbs
  - \*Programmable from Microcut computer
- Variable knife speed to assist cutting various product types
- Knife operated by hydraulic cylinders located at each side of the knife beam below table level
- Knife change device using a central lifting unit in knife beam
- Knife height setting and leveling is fully automated from Microcut computer
- Foot treadle operation for soft clamping is coupled with infrared safety curtain interruption for safety
- Energy efficient main motors operate only during cutting/clamping
- 480 volt, 3 phase, 60Hz, 40 amp power required
- Infra red safety eye beams
- Push button safety controls (3 operator stations)
- Meets all US, CSA and CE safety requirements
- Two high speed blades
- Twelve plastic cutting sticks
- Parallel or eccentric cut option
- Microcut Wide Screen (15") computerized back gauge system:
  - \*Back gauge speed variable between 3" to 16" per second
  - \*Color touch screen
  - \*CIP-3/4 compatible
  - \*Network ready
  - \*Management information system (MIS) included
- 141" maximum cut length
- 141" maximum cut width
- 5" maximum cut height
- 9" minimum cut length
- Heavy duty 8 inch wide clamp
- Combination ball bearing lead screw and linear bearing back gauge
- Stainless Steel/Chrome table surfaces with low pressure air jets
- Multiple air blower motors for low pressure air table jets
  - \*Programmable from Microcut computer
- Clamp operated by heavy duty hydraulic cylinder under center of table
- Hydraulic oil cooling included

## SPECIFICATIONS

### Model

Max. cutting width (A)	141.8 in	3600 mm
Side table width (B)	30 in	750 mm
Working depth rear table (C)	141.8 in	3600 mm
Working depth front table (D)	32 in	810 mm
Overall Machine depth (E)	221 in	5620 mm
