

PRISM® Unloader

FEATURES

- Laser positioning for increased accuracy
- 10.4" color touch screen for machine control
- Low pressure air table with blower
- Efficient German Nord motor
- Flexible anti-collision safety bar

The PRISM Unloader is a heavy duty and cost effective addition to any cutting process. Its reliable, smooth operation--facilitated by a stainless steel transfer table with dual paddles that place piles of cut materials on the skid within seconds--normally increases cutting productivity by as much as 40%. They can be ordered to be used on the right or left side of your paper cutter.
